

**AIDOS KUNEEN(ADK)**  
Hades helmet of invisibility

## AIDOS KUNEEN

### ABOUT ADK

Aidos Kuneen is an open source project that focuses on privacy, decentralization and scalability.

Let's face it: our financial privacy is in danger. Banks and governments not only want to keep records of how we spend and store our money, they are also prone to having those records leaked or using the information to enforce their power.

This is where Aidos comes in: it is secure, private, and untraceable.
